

MojaLoop Online Open Source Community Meeting 2024

Language Localization
Luis R. Zulu

A person with glasses is seen from the side, working at a desk with multiple laptops. The laptops display various content: one shows a line and bar chart, another shows code, and a third shows more code. The person's hands are on a mouse and keyboard. The background is slightly blurred, showing an outdoor setting with trees.

ABOUT THE MOJALOOP LANGUAGE LOCALIZATION

Our language localization initiative aims to enhance the global reach and user experience of Mojaloop by offering the software in multiple languages. This effort is crucial for making Mojaloop accessible and user-friendly for a diverse international audience. By localizing our software, we can break down language barriers and create a more inclusive and engaging platform for users worldwide.

To achieve this, our approach involves several key components:

- Researching Existing Libraries
- Understanding UI/UX Best Practices
- Providing Recommendation

OUR GOALS FOR LANGUAGE LOCALIZATION

MARKET EXPANSION

IMPROVED USER EXPERIENCE

COMPETITIVE ADVANTAGE

CULTURAL SENSITIVITY

SOVEREIGNTY & OWNERSHIP

LIBRARIES EVALUATED

i18next

Globalize JS

React Internationalization (React-Intl)

Gettext

Polyglot
