Crossing the Language Barrier

The Mojaloop Localisation Workstream

Maxime Nzorubara, Elijah Okello & Eddy Kayiganwa

jengacore.

“To be truly inclusive, you must be able to communicate in *everyone’s* language.”

INCLUSION, SPOKEN IN EVERY LANGUAGE

The Barrier We’re Solving

- A large share of Mojaloop’s next wave of adopters sits in **Francophone Africa**.
- Core documentation, the Testing Toolkit, and community materials are **English-first**.
- For a non-English-speaking implementer, engineer, or regulator, that is friction at every step; reading the docs, running the quickstart, joining the community.
- Friction at the entry point means **slower adoption**, and **fewer local contributors** feeding back into the project.

The Localisation Workstream

A **Mojaloop Community workstream**, kicked off in **March 2026**, currently led by jengacore with contributors from across the community.

> **Mission** - make Mojaloop documentation and software components accessible to non-English-speaking adopters and engineering teams, with priority on **Francophone Africa**.

Our Goals

01

Static Documentation Translation

Translate the core Mojaloop documentation pages into French.

02

Software Localisation

Extend localisation into Mojaloop's user interfaces, starting with the Business Operations Framework.

03

Sustainable Multilingual Framework

Build a repeatable process to reconcile translations with source material, so future languages don't start from zero.

Meet the Contributors

The team behind the localisation effort

- Rébécca Assongba
- Prince Kangbode
- Chancel Zefra
- Eddy Kayiganwa
- Elijah Okello
- Maxime Nzorubara
- Sam Kummary
- Paul Makin
- Julie Guetta

What We’ve Delivered

Community Page	Done	Technical Page	Done
Adoption Page	Done	Quickstart / Getting Started	Done
Product Page	Done	Peer Review (Paul Makin)	Done

All five core documentation pages are translated into French, peer reviewed, and merged.

A LIVE LOOK

Now live, in French.

Merged and shipped on the official Mojaloop documentation site.

docs.mojaloop.io / **fr**

Status Check

Documentation translation

Core pages translated, peer reviewed, merged, and live on the official Mojaloop documentation site.

Software localisation

Has not started. The BOF and other interfaces are still English-only.

Sustainable framework

In progress. Developer experience and source-material reconciliation work is underway, not finished.

What’s Next

Developer experience & source-material reconciliation

Maxime, Chancel, Rébécca, Prince

Page versioning so translations stay aligned as English docs evolve

Sam Kummary

Inventory of non-translated images on the Product page

Chancel, Rébécca, Prince, Paul Makin

Begin software localisation, starting with the BOF

Beyond French

Building a sustainable multilingual framework, not a one-off translation

Reusable pipeline

Translation and review, standardised.

Terminology reuse

Defined once, reused across every language.

Next: Portuguese

Identified as the next priority language.

Pipeline: English source docs → Translation → Peer review → Publish (`fr/`) → Reconciliation as source updates → New language onboarding

THIS IS BIGGER THAN TRANSLATION

Language access changes
who can read, **who can build**, and **who can contribute back**.

Get Involved

Browse the French docs on the official Mojaloop documentation site

Working copy also at `docs.jengacore.com/fr`

Review the Workstream Task Document

Check the Documentation Pull Request

Join the Monday Weekly Meeting

Translators, reviewers, and reconciliation help are all welcome for French and for the next language.

Questions & Discussion

We welcome your feedback and inquiries.
